

AIR 1 serves me in many ways. First, it helps me connect with the country as a whole. Through a nation-wide station, I feel more apart of this great country! Secondly, countless young people in my area enjoy and are uplifted through the broadcasting of AIR 1. We are united through all knowing the great music from this station. Without AIR 1, many many of my frinds and others in Wichita would be lacking an excelent source of encouragement, hope, and sanity in this crazy world we live in. There have been a number of times when I personally have been in great need for a positive message, and it was provided just in the right time through the excelent programming of AIR 1.

I believe that it is in the best interest of the public to continue receiving the excelent programing and services from AIR 1. AIR 1 truely is the positive alternative to much of the mainstream music currently available. Please take actions to help keep AIR 1 on the air. I desperately need to continue listening to that station.

Thank you.
